

We are partnering with the Producer Partnership  
**to process animals that are  
purchased as donations  
free of charge**  
in their USDA inspected facility in Livingston.

This option, with USDA inspection, opens the doors to donate the protein to nonprofit organizations of the buyers choice such as schools, food banks and senior centers.

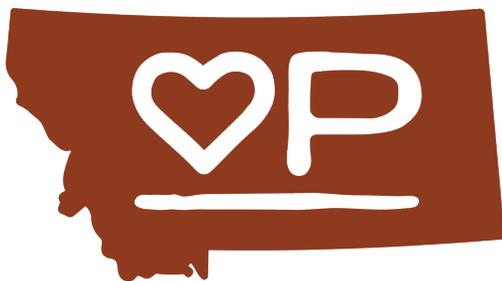

### **The Producer Partnership will:**

Pick-up the animals purchased as donations and transport them to their USDA facility in Livingston.

Contact the nonprofit organization, school, etc on how they would like the animal processed.\*

\*Note: The Producer Partnership is not able to process wild game, fowl or cure/smoke pork for bacon or ham.

Will deliver the processed protein to a central location for pickup by the nonprofit organization who is receiving the donation.

## **THE PRODUCER PARTNERSHIP**

The Producer Partnership was founded in Spring 2020 with the mission to end hunger in Montana. The nonprofit organization partners with livestock producers across the state by processing donated livestock into top quality protein and providing it to food banks, schools and senior centers to help those in need. This is the spirit of Montana neighbors helping one another.
